SUMMARY

For the past three years I've focused on front-end development, from personal projects and hands-on practice to building complete interfaces with React and Next.js. I believe a good interface lets people reach their goal without thinking about the path.

EDUCATION

B.Sc. Computer Engineering 2024 — Present

Islamic Azad University — Ardabil, Iran

Currently studying · open to internships and junior roles

SKILLS

Front-end

React · Next.js · TypeScript · JavaScript (ES2023)

Styling & UX

Tailwind CSS · CSS / SCSS · Motion & Animation · Figma

Tooling & ecosystem

Git & GitHub · Node.js · Testing (Vitest / Playwright) · Vercel & CI

PROJECTS

Product Store 2026

A responsive storefront built with Next.js that pulls products from the Fake Store API, with category filters, a detail modal, loading skeletons, cart and sign-in pages.

Next.js · TypeScript · Tailwind · REST API

License Market Landing 2026

A landing page for a software license and services marketplace: hero, offers, product categories, blog and a sign-in form, built with shadcn/ui.

Next.js · TypeScript · shadcn/ui · Embla

This Portfolio 2026

A bilingual FA/EN personal site with full RTL support, scroll animations, a responsive layout and no back end.

Next.js · TypeScript · Tailwind · i18n

ABOUT

I enjoy working closely with designers and back-end engineers, I'm picky in code review, and I always try to leave accessibility and performance a little better than I found them.
